

## **e-Stamping Services**

### **What is e – Stamping System?**

e-Stamping system introduced by Stock Holding Corporation of India Ltd (SHCIL) is a web based system. The system seeks to replace the existing modes of issue of stamp papers by the State Governments through a highly secure and tamper proof Stamp Certificate with a Unique Identification Number (UIN), thereon which is verifiable.

### **Mechanism of e – Stamping Services:**

Under the system, the clients can approach an Authorized Collection Centre (ACC) i.e. Authorized Bank's authorized Branches, provide the requisite details for purchase of e - stamp certificates and remit applicable stamp duty. ACC enter the details in the e-Stamping system and print the stamp certificate after all the consistency checks are done and the money is accounted for.

All ACC Centers i.e. Authorized Branches; transfer the stamp duty collected to the Nodal Branch of the state on the same day, which is to be transferred by Nodal Branch to SHCIL on T+1 day for their further transfer to concerned State Govt. Department.
